Timothy L. Fagan

Erdenheim, PA | (610) 299-8856 | tlfagan@gmail.com | linkedin.com/in/timfagan | tlfagan.com

PROFESSIONAL SUMMARY

Player-coach in knowledge management and content operations, accountable for the full content lifecycle (creation, governance, approval, production, QA, publishing) on platforms serving 2M+ business customers and 30,000+ employees, including tools used by business customer support teams. Worked directly with division call center KM leads, and interviewed and shadowed support agents so content and functionality fit their call-to-call workflows. Aligns Legal, Operations, Marketing, and Communications, and stays close enough to the work to dig into the technical details when a problem needs it. Since 2026, have applied the same governance discipline to AI, shipping Claude-powered tools on structured knowledge bases.

EXPERIENCE

The Hershey Company | Hershey, PA **February 2024 - May 2026**

Manager - Corporate Communications

Led content operations and communications for the CTO/CIO organization during enterprise digital transformation.

- Oversaw information architecture, content governance, and operational standards for enterprise content hubs across a large, matrixed organization.
- Redesigned SharePoint content architecture to improve discoverability, access, and consistency across a distributed workforce. Administered site access, organized files, and added metadata to improve search.
- Owned operations for Hershey's multi-tier enterprise recognition program, spanning nine business functions and the CEO; managed quarterly events recognizing 100+ honorees annually and directed eight executive video productions, from script through final cut, for company-wide all-hands presentation.
- Partnered with external agencies to develop and produce branded content across executive thought leadership, digital campaigns, and presentation materials, managing relationships, delivery timelines, and brand standards.
- Collaborated with the CTO and CIO to develop strategic content and amplify digital transformation initiatives, applying Prosci methodology, stakeholder analysis, and audience impact assessment to drive alignment and adoption.

Comcast Business | Philadelphia, PA **February 2020 - December 2023**

Senior Manager - Change and Knowledge Management (National)

Business and product owner for the Comcast Business internal knowledge library and customer-facing Help & Support website.

- Owned the full content lifecycle (creation, governance, approval, production, QA, publishing) for platforms serving 30,000 employees and 2M+ business customers, running sprint planning and prioritization with a cross-functional delivery team.
- Owned the content side of the migration from Oracle Knowledge to RightAnswers: pre-migration content audits, taxonomy redesign, metadata modeling, content standards, and quality audits across 20,000+ articles and assets. The platform team handled the technical build, and deployment ran with no major defects or service disruption.
- Drove the move from quarterly to monthly feature pack releases, tripling release cadence. Directed the team that built the deployment process and release notes.
- Built a feature tracker with the dev team to align engineering timelines with content and communications priorities.
- Led change management and adoption for platform migrations across the internal team and customer support organization, aligning Legal, Operations, Marketing, Product Management, and Communications.
- Continued interviewing and shadowing call center agents, and partnered with division call center KM leads, to fit content and functionality to call-to-call workflows.

Comcast Business | Philadelphia, PA **2018 - 2020**

Manager - Knowledge Management (National)

Led the evaluation and redesign of the customer-facing knowledge platform, setting the foundation that the next-generation system would be built on.

- Led platform selection initiative serving as product owner for enterprise KM evaluation, defining requirements, leading vendor assessments, and developing migration strategy for a platform serving 2M+ customers.
- Owned comprehensive redesign of information architecture, taxonomy, and metadata strategy for customer-facing Business Support site (300,000+ monthly visitors, 400+ articles).
- Managed team of three content specialists and one co-op, overseeing end-to-end content lifecycle including creation, governance, approval, QA, and archival; achieved 20% reduction in expired or redundant content. Applied a scoring model weighted by views, ratings, and time since last review to prioritize review across roughly 1,800 articles.

Comcast Business | Philadelphia, PA **2015 - 2018**

Supervisor - Knowledge Management (National)

Led the redesign and relaunch of an internal KM platform used daily by thousands of employees, then built the analytics foundation to keep improving it.

- Led the redesign and relaunch of an internal KM platform serving 5,000+ daily users, coordinating development, QA, and operations to deliver the launch on schedule with no service disruption.
- Built a user activity analytics practice from the ground up, turning raw adoption data into a continuous improvement loop for the team and a small staff of content specialists.
- Managed repository access and built content within the tool for business customer support teams.

Comcast Business | Philadelphia, PA **2010 - 2015**

Senior Analyst - Process Optimization and Knowledge Management (National)

Built and managed the procedural content foundation that 30,000 employees relied on daily.

- Built and governed a procedural content library from the ground up within a proprietary CMS, giving 30,000 employees reliable access to the operational content a 2M+ customer base depended on.
- From 2013, interviewed and shadowed call center agents to fit procedural content to their call-to-call workflows.
- Caught quality and consistency issues before they reached customers, running QA across platforms to keep content accurate and governance-compliant.

AI PROJECTS AND PORTFOLIO

Self-directed applied AI development using the Claude API and Claude Code. More details at tlfagan.com.

- **Seabright**: AI property assistant on the Claude API and an Airtable knowledge base to help family and guests navigate and manage stays. Source-tagged answers, a 35-case regression suite, password-protected, live on Vercel.
- **Garden Golf League**: Mobile-first app for a 25-player league with a leaderboard, RSVPs, and server-side World Handicap System handicaps. Claude vision reads handwritten scorecards into a human-reviewed grid.
- **What Don't You Want**: Family recipe manager where Claude turns a URL, photo, or PDF into a structured recipe with nutrition in Airtable. Also an AI-merged shopping list and a photo-scanned pantry tracker.
- **StreamWeaver**: Family movie and TV recommendation engine ranking by taste history and availability, with age-scaled content flags. Rule-based, built with Claude Code on Vercel and Airtable.
- **TeamWeaver**: Schedule app for kids' games and practices used by two families, with daily calendar sync, per-family views, and drive times. Built with Claude Code on Vercel and Airtable.
- **Job-Search Agent**: Scheduled Python and GitHub Actions pipeline that pulls jobs from multiple APIs, scores them with the Claude API, and emails a daily digest. Includes a response-email classifier and salary filter.

TECHNICAL SKILLS AND TOOLS

- Content and Knowledge Platforms: SharePoint, Sitecore, RightAnswers, Oracle Knowledge, Salesforce Libraries, Axios HQ, Loop, Confluence, Airtable
- DAM and Content Operations: Taxonomy Design, Metadata Management, Asset Governance, Content Lifecycle Management, Publishing Processes, Style Guide Development
- Agile and Project Management: Jira, Rally, Asana, ServiceNow, Microsoft Project, Smartsheet
- Analytics and UX: Google Analytics, User Activity Analytics, pNPS, User Acceptance Testing (UAT), Agent Interviews and Job Shadowing
- GenAI and Automation: Claude API (text and vision), Claude Code, n8n, Make.com, AI-Powered Workflow Development
- Development and Deployment (via Claude Code): Python, JavaScript, GitHub Actions, Vercel, Airtable API, Google Apps Script

CERTIFICATIONS

- AI Automation - Temple University, Certified 2026
- SAFe Agilist 6.0, 2024; SAFe 4.0 Product Owner / Product Manager
- Prosci Change Management Methodology, Trained 2020

EDUCATION

Drexel University | Philadelphia, PA - Bachelor of Science, Communication and Applied Technology (Business Minor), Graduated Magna Cum Laude
